## **INTERNET BROWSER UPDATE**

It's time to start saying goodbye to some old internet browsers. Effective August 31, 2014, NEOGOV will be discontinuing support for Internet Explorer 8 and Firefox 24 and below. Browsers that we will be supporting as of September 1st are as follows:

- Internet Explorer 9, 10, 11
- Firefox 25 and above

If you are using an older version of one of these browsers, it is time to update. But, don't worry. It will not suddenly stop working as of August 1st. However as we move forward, we will no longer test features or code to the standards of older browsers. So, eventually some features may stop working if you haven't upgraded.

In consistency with best practices in the industry and to provide quality service to our customers, our policy is to support the current release for both Internet Explorer and Firefox, as well as the previous two versions. For job applicants, we will continue to support browsers used by 5% or more of jobseekers.
